THE 4 STEP CHECKLIST

- 1. EDUCATE** – Use online seminars and meet & greets with employees to raise awareness for what First Primary Care offers them through their plan design and care team
- 2. ONBOARD** – Employees will enroll in real time with us to ensure technology is correctly set up to be utilized
- 3. ENGAGE** – Our team continues to maintain a close relationship with each member we interact with. We work to treat short term illness, while establishing long term health goals and a plan to get there. Our team is available any time to assist with questions
- 4. ADVOCATE** – Care coordination is offered at no cost to assist members in setting up surgeries, office visits, and treatments that First Primary Care does not provide.

WHAT WE DO:

At First Primary Care, a Direct Primary Care Provider, our goal is to ensure that your employees and their dependents have access to the highest quality Primary Care available. Direct Primary Care provides access to a specific Care Team 24 hours a day / 365 days a year. Access to the Care Team can be done in-person or virtual through a secure app that can be downloaded on their smartphone or tablet. By having a direct relationship established between patients and The Care Team, the focus is no longer on Sick Care but rather on Healthcare! We look forward to helping your team with their "Health" Care journey.

IN-OFFICE PROCEDURES INCLUDED:

- ◆ EKG
- ◆ Abscess Drainage
- ◆ Breathing Treatments
- ◆ IUD/Nexplanon Insertion
- ◆ Pap Smears
- ◆ Steroid Injections
- ◆ Minor Skin Procedures (Cyst/Skin Tag Removal)
- ◆ And other procedures

PRESCRIPTIONS INCLUDED:

Prescription drugs are one of the high cost claims that affect companies the most. Whether you need a maintenance medication, urgent care medication or need to find a new pharmacy with better prices, you're covered.

LAB TESTS 4X A YEAR AT NO COST:

Common diagnostic labs used for health maintenance and monitoring are included in First Primary Care at no cost up to 4x a year.

Welcome to the intersection of high-value care, transparency, and relationship-driven treatment.

Dr. Geetinder Goyal, MD
